# *CALL FOR PROPOSALS:*

## Applied Analytics & Data Infrastructure Catalyst Program

*Priority deadline:* **March 1, 2024**

Does your research require analysis or data support? Take advantage of this funding opportunity to collaborate with the MAP Academy by submitting a proposal for the Applied Analytics and Data Infrastructure (AADI) Catalyst Program. Successful applicants may receive up to $1,500 in project support.

### WHAT IS IT?

The AADI Catalyst Program is an initiative to support the rigor of high-quality, field-based human research at the University of Nebraska. It is made possible through a grant from the Nebraska Research Initiative.

### WHO IS IT FOR?

Full-time faculty in the University of Nebraska system (all campuses) who are engaged in field-based human subjects research and eligible for federal funding. This opportunity is open to all disciplines and departments.

### HOW CAN WE SUPPORT YOUR WORK?

**Example services include, but are not limited to:**
- Providing rigorous methodological and study design support.
- Setting up dynamic data systems.
- Performing in-depth analyses.

### INTERESTED?

Visit our website for details, including how to submit a proposal.

## WHAT IS THE MAP ACADEMY?

The **Nebraska Academy for Methodology, Analytics and Psychometrics** (MAP Academy) promotes the advancement of methodologies, applied analytics and data infrastructure to support and enhance rigorous research within the social, behavioral, health and educational sciences.

## WHAT WE DO

### Conduct original research

We conduct original research in five primary areas: applied psychometrics, mixed methods, prevention science, program evaluation, and statistics and modeling.

### Provide professional training

Training opportunities include visiting scholars, in-house presentations and methodology workshops. We also maintain a comprehensive video archive of past presentations.

### Offer research support

Our team provides project services during proposal development and after projects are funded, including instrument development, data management, analysis and dissemination.

## LEARN MORE

Visit **mapacademy.unl.edu** to learn more about our expertise and to explore collaboration opportunities.

Please contact us with any questions or to discuss your specific project needs. We look forward to working with you.
